As one of the U.K's leading installers of pattern imprinted concrete, our approach is based on two key principles; our determination to provide the highest quality products and our dedication to excellence in customer service.

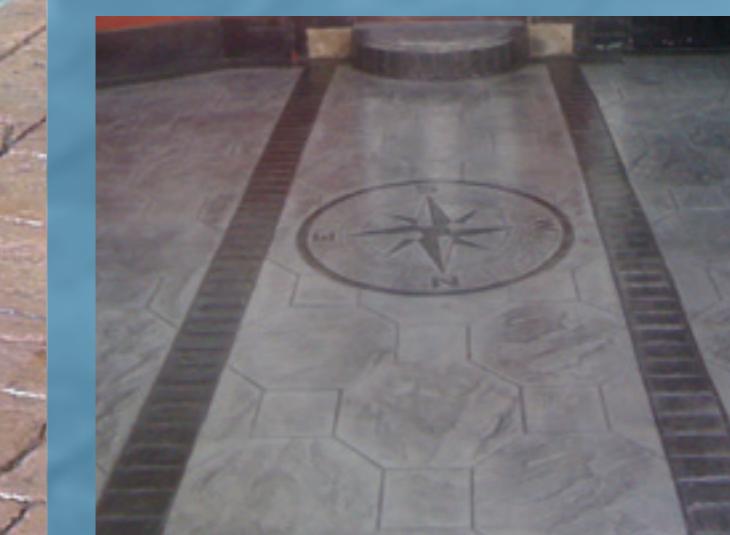

We take tremendous care in everything we do and treat all installations as a work of art. Priding ourselves on offering a professional service, our expert team will be on hand from conception to completion. By using our own team of specialist craftsmen, we guarantee an exceptional result every time.

Our membership of the Concrete Society and the Guild of Master Craftsmen means we have access to the latest technological innovations, ensuring DCS offers a product that not only looks stunning but will continue to do so for many years. For complete peace of mind, we offer a 5 year guarantee on all installations but work diligently in the first place so you never have to use it.

Pattern imprinted concrete is extremely versatile and can be designed to fit into any situation. Whether you have a contemporary property, period home or even a listed building, our expert designers will work through the vast range of colours and patterns and find a solution that is not only in keeping with your home but designed with yours specific tastes in mind.

Our range of colours are fade-free and will not be affected by sunlight or temperature. Alongside providing permanent colour, virtually no maintenance is needed. The surface remains weed-free and stain resistant and when installed properly, patterned concrete will never sink. Unlike inferior alternatives, pattern imprinted concrete is not adversely affected by pressure washing. The surface sealant protects the concrete from grime such as oil spills and makes it incredibly easy to clean.

## FEATURES

We have the expertise to offer features such as hand-carved steps, cobble circles and even compass imprints. We have even created bespoke prints to customer specification. Talk to our designers about any ideas you have to put your personal

mark on your home. As part of our ongoing commitment to excellence in customer service, we are constantly investing in the latest concrete technology to create work that really stands out from the crowd.

**YOUR DRIVEWAY** is the first thing people see when visiting your home thus making its appeal something of real importance. Decorative Concrete Specialists use the best materials, coupled

with expert designers and engineers to create the perfect entrance to your home. The possibilities are endless and our designers will work with you every step of the way to create the driveway of your dreams.

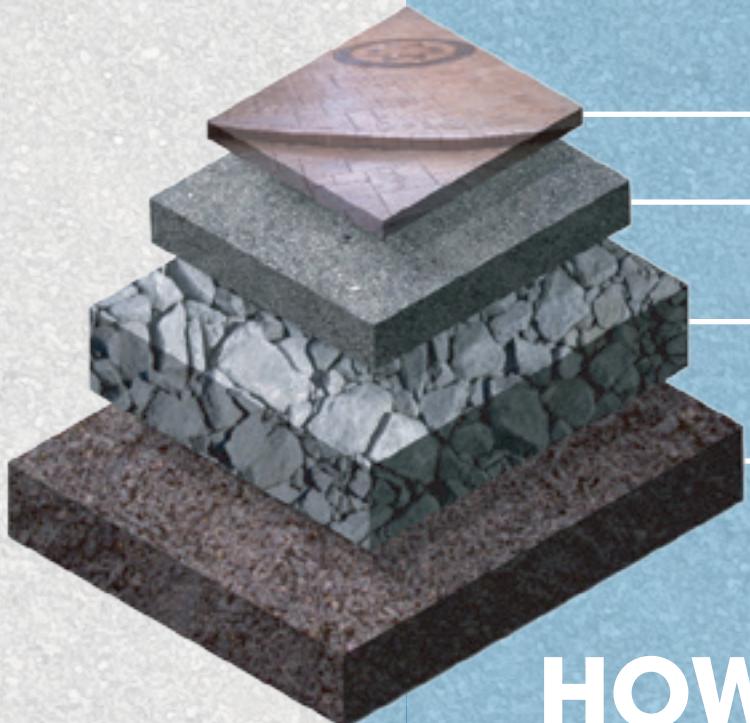

## DRIVEWAYS

## PATIOS

**P A T T E R N** imprinted concrete is an ideal solution for a perfect driveway due to the strength and durability of the concrete surface, but patios and pool surrounds are areas where the extensive design capabilities and flexibility of pattern imprinted concrete can be really exploited. We can realistically replicate any natural surface much more cost effectively, with little or no maintenance and with none of the associated problems. Our Design Consultants will work with you to create a patio or pool surround design which complements both your house and garden, bringing them seamlessly together.
